PROFESSIONAL SUMMARY

Motivated MCA student and Python Backend Developer with hands-on experience building web applications using Python, MySQL, and Machine Learning. Skilled in developing REST APIs, backend systems, and database-driven applications. Built real-world projects including a Diabetes Prediction System with 97% prediction accuracy and an Expense Management System. Currently expanding expertise in FastAPI and MongoDB. Seeking a Python Backend Developer role to deliver scalable, high-quality software solutions.

TECHNICAL SKILLS

Programming Languages: Python, PHP, Machine Learning / AI

Frameworks: React JS, Flask, Django, FastAPI

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Postman, Render

Soft Skills: Problem-Solving, Communication, Teamwork, Analytical Thinking

Languages: English, Gujarati, Hindi

PROJECTS

Diabetes Prediction System Using Machine Learning

January 2026 – March 2026

Technologies: Python, Flask, Scikit-learn, MySQL, HTML, CSS, JavaScript, Render

- Developed a Flask-based diabetes prediction system using Python and machine learning, achieving 97% accuracy with the Random Forest model.
- Built and compared six machine learning models: Random Forest, SVM, Logistic Regression, Decision Tree, KNN, and Naive Bayes.
- Integrated MySQL for data management and designed a responsive frontend using HTML, CSS, and JavaScript.
- Deployed the application on Render (live demo available).

Expense Management System

January 2025 – April 2025

Technologies: Python, Flask, MySQL

- Built a Python and Flask dashboard that logs expenses and generates bar and pie charts for visualization.
- Implemented two-step verification, budgeting, expense calculation, monthly summaries, chart previews, and history tracking.

Shreeji Furniture

December 2023 – March 2024

Technologies: PHP, MySQL

- Developed an e-commerce website for a furniture business featuring a catalog of contemporary and classic furniture pieces.
- Built core site functionality using PHP and MySQL for product and data management.

PUBLICATION

Intelligent Diabetes Risk Forecasting via Multi-Classifer Machine Learning

International Journal of Research Publication and Reviews (IJRPR) — Published April 21, 2026

- Published a peer-reviewed research paper on a machine learning-based diabetes risk forecasting system.
- Proposed and evaluated multiple machine learning classifiers for diabetes risk prediction.
- Presented the system architecture, performance evaluation, and deployment of a web-based prediction application.

EDUCATION

Master of Computer Applications (MCA)

September 2024 – June 2026

P P Savani University, Kosamba, Gujarat

Bachelor of Computer Applications (BCA)

August 2021 – May 2024

SSSDIIT, BKNM University, Junagadh, Gujarat

CERTIFICATIONS

- Python Development Specialization — Microsoft
- Data Science Using Python — Swayam (Government of India)
- Prompting Essentials Specialization — Google
