PROFESSIONAL SUMMARY

I am Solanki Raxit, an MCA student at PP Savani University specializing in Python development. Passionate and detail-oriented, I thrive on solving problems through code and building impactful solutions. With a strong foundation in web development and programming, I continuously expand my skills, guided by creativity, confidence, and dedication. My vision is to grow into a versatile developer who bridges innovative ideas with technology and thrives in dynamic, growth-oriented environments.

PROJECT

DIABETES PREDICTION SYSTEM USING MACHINE LEARNING

PYTHON(FLASK),MYSQL,ML **January 2026 -- March 2026**

Live Project: https://ml-pro-fr6w.onrender.com/login

- Developed a machine learning-based web application to predict the likelihood of diabetes using patient health data such as glucose level, BMI, blood pressure, and age. The system is built using Flask and integrates a trained ML model to provide real-time predictions. It features a user-friendly interface, fast processing, and accurate results to assist in early diagnosis and healthcare decision-making.

EXPENSE MANAGEMENT SYSTEM

PYTHON(FLASK), MYSQL **January 2025 -- April 2025**

- A Python + Flask dashboard that adds expenses and generates bar/pie charts. Includes two-step verification, budgeting, expense calculation, monthly summaries, chart previews, and history.
